

2022 Candidate Survey on the Environment

Kevin Brown Democrat
House , 56

OPEN QUESTION

Not being an incumbent in the legislature, I do not have a record of environmental policy work. However, I do care deeply about the environment that my children and future generations will inherit from us. I want to work to have a positive impact and become a more environmentally friendly society. I also care about issues of equity, and as such, I would likely prioritize environmental justice issues.

- While change is hard, and I have been uncertain as to whether RCV is the best path to take, I strongly believe in civic engagement and getting more people to participate in their democracy. The idea of more civil elections where more people feel like their vote matters is very appealing to me!
