

TESTIMONY IN **OPPOSITION** OF **HB 6527**
AN ACT INCREASING THE TOTAL OUTPUT OF CLASS III SOURCES

March 3, 2021

To: Honored Chairs Sen. Needleman and Rep. Arconti and Distinguished Members of the Energy & Technology Committee

From: Megan Macomber, Connecticut League of Conservation Voters

On behalf of the Connecticut League of Conservation Voters (CTLCV), thank you for the opportunity to submit testimony **IN OPPOSITION of HB 6527** to increase Class III Renewables in the state.

As Connecticut works towards achieving a 100% zero-carbon electric grid by 2040, **increasing the output of anything but Class I Renewables works against our state's clean energy goals.** There are no incentives or value to be obtained by Class III renewables. Increasing the output of these sources undermines CT's zero carbon energy work and delays our progress in mitigating climate change.

On behalf of the Connecticut League of Conservation Voters, I urge you to **OPPOSE HB 6527** and ensure CT is working efficiently toward achieving its energy goals. Thank you for your consideration of these comments.
