- Email your completed survey to: ctlcv@ctlcv.org

Candidate Name: Brenda L. Kupchick

Running for: House Senate District No: 132 Party: Republican - Independent

Candidate/Campaign Mailing Address: 213 Farist Road Fairfield CT 06825

Phone: 203-336-1724 BrendaKupchick2014.com or facebook Brenda Kupchick for State Representative Email: Bkupchick@gmail.com

Are you enrolled in the Citizen's Election Fund for public campaign financing? Yes No

Do you have a primary? Yes No

Are you an incumbent? Yes No

Part 1: If elected, what position do you expect to take on the following environmental issues?

Please mark boxes named "Support," "Uncertain," and "Oppose" with an x.

Topic	Question	Support	Uncertain	Oppose
Parks	Would you support state park and forest revenues going to park and forest operations and maintenance rather than to the General Fund?	XX		
Comments:				
Transportation	CT is one of the 10 states most dependent on federal funds as a percentage of their transportation expenditures. More than half of the states and localities have moved forward on increasing their funding share. Do you favor this and how might we do it in CT?	XX		

Comments:			
Property Tax Reform	CT's property tax burdens small towns, strangles cities, undermines mass transit and drives sprawl. Would you be an advocate on behalf of the environment in the tax reform debate, especially with regards to property tax?	XX	
Comments:			

<i>Topic</i>	<i>Question</i>	Support	Uncertain	Oppose
Pesticides	The American Academy of Pediatrics and many other science and medical institutions have warned that pesticides (including herbicides) are harmful to human and ecological health. CT has a ban on use of lawn care pesticides on grounds of elementary and middle schools. Would you support legislation to extend this ban to high schools and public parks where children play?	XX		
Comments:				
Pesticides	Should towns have more authority to limit or guide pesticide applications within their borders, including roadside spraying and applications of pesticides in wetlands and surface water?	XX		
Comments:				
Water Source Protection	CT normally uses decades old data for setting standards and guidance for stormwater management. Would you support requiring the state to upgrade its standards using scientifically validated, up-to-date statistics on volumes of water associated with extreme storms and annual precipitation?	XX		
Comments:				
Microbeads	Many personal care products such as shampoos and toothpaste are being manufactured using tiny plastic microbeads. Once microbeads are washed down the drain, they can enter lakes, rivers, and eventually the ocean through sewage overflows or pass through sewage treatment plants. Microbeads, like other plastics, can absorb toxic chemicals. They can be mistaken for food by aquatic life and can be passed up the food chain to larger fish, wildlife, and humans. Would you support legislation to protect our waterways from this new environmental threat?		XX	
Comments: I don't know enough about this issue.				
Conservation Lands	Would you support passing a state Constitutional Amendment to better protect state conservation lands from being given away for non-conservation purposes?	XX		
Comments:				

Energy	Would you support policies or legislation to protect and expand the state's cost-effective energy efficiency programs opposing any attempts to raid the CT Energy Efficiency Fund for state budgetary needs?	XX		
Comments:				
Energy	While other states promote shared net metering and sub metering for solar, fuel cell and other distributed renewable sources, CT imposes regulatory barriers that effectively prevent development of these projects in our state. Would you support legislation that removes these barriers and enable clean renewable distributed generation to move forward?	XX		
Comments:				
Toxins	Would you support legislation that requires the Department of Public Health to identify chemicals of high concern to children, manufacturer disclosure of those chemicals and a process for recommendations to reduce exposure?	XX		
Comments:				

Part 2: What environmental issue has lacked the attention in Connecticut that it deserves? As a legislator, what will you do to change that? I feel we need to do more to protect Long Island Sound and rivers in the state. I support the Long Island Sound Blue Plan. I'd like to work on clean energy investments. I think we can do a lot more to invest in this area to protect the environment and reduce residents high energy costs.

Part 3: What are the environmental priorities in your district? Fairfield residents are very active in conservation and care deeply about The Sound, Mill River and High Energy Costs.

Part 4: If you are elected, what would be your top environmental priorities for the 2014 legislative session? Please identify up to three and rank the three in order 1, 2, or 3:

- Parks
- 2 Transportation
- Pesticides
- 3 Water Source Protection

Microbeads
Conservation Lands

1 Energy

Toxins

Property Tax Reform

____ Other (please explain)
