- While I haven't officially worked on any environmental issues as I have been focused more directly on education and gun violence prevention programs, I have always been a supporter of actions that create healthier, more environmentally sound spaces. My father was the Chair of his Conservation Commission for over 20 years, so these discussions and awareness have always been part of my life.

My top priority would be working to expand alternate energy production programs such as wind and solar.

**Additional Comments:**

- I am happy to continue this discussion if that would be helpful. Thank you for your time and consideration.
