

## 2022 Candidate Survey on the Environment

Joe Miller Democrat  
House , 116

### OPEN QUESTION

My top environmental priority will be to work towards transitioning to, or developing, efficient, green, renewable energy powered public transportation. The environment matters to me because my generation and the next will face the largest impact of imminent effects of climate change and decades of loosely regulated polluting firms. We must also work with firms who pollute in order to reduce or eliminate their levels of polluting. We must also work to provide a science-backed, economically effective system of mitigation for industries with low to no option to eliminate polluting byproducts of production.
